

Autopista del Guadalmedina, Concesionaria Española Sociedad Anónima is an essential infrastructure for the province of Malaga in which it is located as it provides a solvent and effective solution to some of the road communication problems that existed in the connection with Antequera, the geographical and strategic center of Andalusia, with the capital of the province and the nearest exit point to the sea. The configuration of the network enhances journeys from the motorway to the western and eastern Costa del Sol, around Malaga and enables communications with municipalities in the region of Antequera such as Casabermeja, Villanueva de la Concepción and Villanueva de Cauche.

That is why the owner of Autopista del Guadalmedina, Concesionaria Española S.A., hereinafter GUADALCESA, through its management, has promoted the implementation of a **Sustainability, Quality and Environmental Management System** in order to establish the general principles and foundations that should govern Autopista del Guadalmedina's strategy, to ensure that all its activities are carried out in a way that promotes the creation of long-term value for society and other stakeholders, fostering a positive social, economic and environmental impact and contributing to the Sustainable Development Goals (SDGs) promoted by the United Nations, committing to the realisation of a sustainable future for all stakeholders.

Through the implementation of this system, GUADALCESA's management is committed to the following aspects:

- **Support the United Nations 2030 Agenda for Sustainable Development and its Sustainable Development Goals (SDGs)**, as well as the principles of the Global Compact on human rights, labour standards, the environment and the fight against corruption.
- **Define and periodically review the company's Sustainability Model**, on which the Sustainability Strategy is based.
- **Establish guidelines for action on issues such as respect for human rights, environmental protection, health and safety, energy management and the fight against climate change, efficient use of resources, diversity, equal opportunities, fiscal responsibility, prevention of illegal behaviour and the fight against corruption.**
- **Integrate sustainability at all organisational levels of the company**, ensuring the availability of the necessary resources to do so, taking into account the expectations of stakeholders in terms of sustainability.
- **Promote a fair energy transition** that takes into account its impact on workers, local communities and society in general.
- **Reduce or avoid greenhouse emissions** from the company's activities, contributing to mitigating the effects of climate change and undertaking compensation actions in appropriate areas for their implementation.
- **Evaluate and review risk management and control systems** systematically, establishing mechanisms for continuous improvement, evaluating performance throughout the entire life cycle, carrying out the necessary actions to achieve the proposed objectives and prevent harm to people, society and the environment, defining verification, audit and control processes for this purpose.

- **Understand, analyse and manage the expectations of the company's stakeholders**, such as shareholders and the financial community, employees, customers, partners, suppliers and contractors, public bodies and institutions, the media, local communities and society in general. The company has various communication channels available and accessible to inform, involve and maintain a continuous dialogue with its stakeholders and is committed to the continuous disclosure of aspects aimed at the sustainability of the company itself and its stakeholders.
- **Respond transparently to stakeholders** through economic, environmental and social performance indicators published in the company's Annual Report.
- **Promote and require sustainability commitments** consistent with/similar to those defined internally throughout its value chain: customers, partners, product and service suppliers, and other stakeholders.
- **Ensure compliance with current legal requirements**, internal regulations, and any other requirements to which the organisation subscribes in the company's activities and facilities.

The management of GUADALCESA is committed to the continuous improvement of the Sustainability, Quality and Environment system and to improving environmental performance.

This **Sustainability, Quality and Environment Policy** was approved on 15 December 2025 by the Board of Directors of Autopista del Guadalmedina C.E.S.A. and entrusts its communication to all staff of the organisation and those acting on its behalf, to be published on the website in a prominent place and made available to anyone who requests it.

In Casabermeja, 15 December 2025

Signed: Máximo del Río Ortiz
Counselor of Autopista del Guadalmedina, C.E.S.A.
